

Exterior Paint Color Options

Homeowners wishing to change an exterior paint color should submit an ARB Submittal Form listing the area(s) to be painted with colors chosen from the corresponding three lists below. You can view the colors as a group on the [Sherwin-Williams' website](#). Please be advised of the following:

- Sherwin Williams paint does not need to be used. Give the paint color and Sherwin Williams number to another paint store (Home Depot, Lowe's, Glidden) and ask them to match the SW paint color.
- If you are painting stucco the same or a different color, you need to use an acrylic latex product. Reputable paint stores can advise on paint for stucco and whether or not a primer is needed.
- Only six garage door colors have been identified. Those identified are marked with an asterisk in the Accent Colors section. Not all accent colors will be approved for garage doors but homeowners are welcome to propose an accent color that is similar to other garage door colors in the community.
- If you are trying to find out the original colors for your home, some of the documents on this [webpage](#) might be helpful.
